

Ceracade[®]

Skin Emulsion

Rx Only | For Topical Dermatological Use Only

DESCRIPTION

Ceracade[®] Skin Emulsion is a steroid-free, fragrance-free, ceramide-dominant formulation.

INDICATIONS AND USAGE

Ceracade Skin Emulsion is to be used to treat dry skin conditions and to manage and relieve the burning and itching associated with various types of dermatitis, including atopic dermatitis, irritant contact dermatitis and radiation dermatitis. Ceracade Skin Emulsion helps to relieve dry, waxy skin by maintaining a moist wound and skin environment, which is beneficial to the healing process.

CONTRAINDICATIONS

Ceracade Skin Emulsion is contraindicated in persons with known hypersensitivity to any of the components of the formulation.

WARNINGS

Ceracade Skin Emulsion does not contain a sunscreen and should always be used in conjunction with a sunscreen in sun exposed areas. In radiation dermatitis and/or in conjunction with ongoing radiation therapy, apply following radiation therapy. Apply twice daily or as indicated by the radiation therapist. After application, a temporary tingling sensation may occur (10 to 15 minutes). Keep this and similar products out of the reach of children. Follow directions for use. If condition does not improve within 10 to 14 days, consult a physician.

PRECAUTIONS AND OBSERVATIONS

For the treatment of any dermal wound, consult a physician.

- Use Ceracade Skin Emulsion only as directed.
- Ceracade Skin Emulsion is non-toxic; however, it is for external use only and should not be ingested or taken internally.
- If clinical signs of infection are present, appropriate treatment should be initiated. If clinically indicated, use of Ceracade Skin Emulsion may be continued during the anti-infective therapy.
- If the condition does not improve within 10 to 14 days, consult a physician.
- Ceracade Skin Emulsion does not contain a sunscreen and should always be used in conjunction with a sunscreen in sun exposed areas.
- In radiation dermatitis and/or in conjunction with ongoing radiation therapy, apply following radiation therapy.
- Do not apply within 4 hours prior to radiation therapy.
- Apply twice daily or as indicated by the radiation therapist.
- Following the application of Ceracade Skin Emulsion, a temporary tingling sensation may occur (10 to 15 minutes).
- Keep this and other similar products out of the reach of children.

INSTRUCTIONS FOR USE

Apply a thin layer to the affected areas 2 times per day (or as needed) and massage gently into the skin. If the skin is broken, cover Ceracade Skin Emulsion with a dressing of choice.
